## **DESCRIPTION:**

• Smart Sinus Ups is high quality device, generates a pure Sinusoidal voltage at the output 230V  $\sim$  +/-5%.

• Carefully selected high quality components from well-known manufacturers.

• Super-charger digital adjustable charger, min 9Ah to max 200Ah with IU characteristics and temperature compensation. Easy to add external batteries for extended autonomy.

- Smart technology enables high reliability, fully automated and independent system.
- Long life -UPS life without repairs over 15 years (not applicable for batteries).
- Wide input voltage operation range (min 150V $\sim$  max 290V $\sim$  without degrading power).
- Lots of quality protections.
- Saving event+log alarms in real time.

• Unique concept of Service Support, the purchase of our UPS devices gives you special software through which our product is directly connected via the Internet to the service mail of our company.

Advanced UPS monitoring software that has the unique concept of generating its own local area network between a UPS device and one or more computers / servers.
In situations where the mains voltage disappears and the battery is discharged or any alarms occur, UPS before shutting down, executes at the same time shutting down operating systems on all computers / servers, then the UPS device shuts off. In the event of a power failure or any alarm, the UPS sends alerts on monitors of all computers.
